

# Coweta Fayette Electric Membership Corporation

## Net Metering

### Steps for Interconnection:

1. Complete a Distributed Generation Facilities and Net Energy Metering Interconnection Application (DG application). Please complete all sections in their entirety and Coweta-Fayette EMC member must sign the application.
2. Complete an Interconnection Agreement for Net Metering. This needs to be completed and signed by the Coweta-Fayette EMC account holder listed on the electric account.
3. Email a copy of the final, signed, jurisdictional approval (permit) for member's generating facility from the local government entity with jurisdiction over the member's project (generally the local building and inspections department).
4. Customer may begin parallel operation of generation facility after our visual inspection and sign off, at which time Coweta-Fayette EMC will then schedule the installation of a bi-directional meter.

Submit all forms to:
